## **GEOMORPHOMETRY 2023 PAPER LIST**

		DEM creation and characteristics
P1	Ernest Fahrland, Virginia Herrera, Hanne	Evolution of the Copernicus DEM: beyond today's elevation data with WorldDEM Neo
P2	Paschko and Henning Schrader  Laurence Paul Hawker, Peter Uhe and Jeffrey Neal	FABDEM Updates - FABDEM V1-2
	Peter Guth, Carlos Grohmann and Sebastiano	
P19	Trevisani	Geomorphometric and Geospatial Patterns in Differences Between ALOS and COPDEM
P4	Dean Gesch	Assessing Global Elevation Models for Mapping the Low Elevation Coastal Zone
P5	Richard Feciskanin	DEM generalization using polygonal simplification
		DEM algorithms & parameters
P6	Fei Zhao and Liyang Xiong	A novel algorithm for calculating flow direction in multi-lake areas
P7	Yutao Zhong and Guoan Tang	Quantifying the spatial associations of terrain parameters from digital elevation models  WITHDRAWN
P8	Sebastiano Trevisani and Peter L. Guth	Landscape according to surface roughness: experimenting in the Taklimakan Desert  Exploring the Effects of Acoustic Frequency on Terrain Attributes and Classifications Derived from Digital Bathymetric Models
P9	Vincent Lecours, Benjamin Misiuk and Craig J. Brown	at Multiple Scales
P10	John Lindsay	The time-in-daylight land-surface parameter
	Gaurav Sinha, Samantha Arundel, Romim Somadder,	Landform mapping and classification
P11	David Martin and Kevin McKeehan	Geomorphometric analysis of the Summit and Ridge classes of the Geographic Names Information System
P12	Mihai Niculiță	Neighborhood contextual merging of segments for landform detection and classification
P13	Andrei Dornik, Marinela Adriana Cheţan, Lucian Dragut, Andrei Iliuţă and Daniel Dorin Dicu	Delineation of mapping units for land suitability assessment using land-surface parameters
P14	Ling Yang, Xin Yang and Sijin Li	Urban morphological regionalization based on 3D building blocks: a case of Chengdu City WITHDRAWN
P15	Janusz Godziek	Application of LiDAR-based DTMs and DSMs to detect landforms created by the trees uprooting process
	Christian Douglas Douglas Doffentaine and Compa	Hydrology & Hazards
P16	Christian Depraetere, Benoît Deffontaines and Serge Riazanoff	Hydro-geomorphometrical processing of dense Lidar/DEM: Relationships between landforms and hydrological processes.
P17	Bofei Zhao, Haigang Sui and Qiming Zhou	Flood inundation analysis based on SAR image and DEM: A case study of the 2021 Zhengzhou Flood in China
P18	Alexander Brenning	Novel approaches to spatial model assessment and interpretation: the example of landslide susceptibility modeling
Р3	Maeve DeBuse and Peter Guth	Evaluation of elevation, slope, roughness, and vegetation type on the burn severity of the 2020 Calwood Fire in Boulder County, Colorado
P20	Elisa Klein, Morelia Urlaub and Sebastian Krastel	Crossing the (shore) line: A geomorphometric database of volcanic islands WITHDRAWN
P20	Elisa Klein, Morelia Urlaub and Sebastian Krastel	Crossing the (shore) line: A geomorphometric database of volcanic islands WITHDRAWN  Big Data Geomorphometry
P20	Elisa Klein, Morelia Urlaub and Sebastian Krastel  Nicusor Necula and Mihai Niculita	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation
	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia
P21	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation
P21 P22	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia
P21 P22 P23	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model
P21 P22 P23 P24	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling
P21 P22 P23 P24	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy
P21 P22 P23 P24 P25	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms
P21 P22 P23 P24 P25	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model
P21 P22 P23 P24 P25 P26 P27	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN
P21 P22 P23 P24 P25 P26 P27	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification
P21 P22 P23 P24 P25 P26 P27 P28	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang  Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár  Xiaohui Huang and Liyang Xiong  Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic  Chenrui Li and Xin Yang  Dhanil Dev S G	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry
P21 P22 P23 P24 P25 P26 P27 P28	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang  Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár  Xiaohui Huang and Liyang Xiong  Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic  Chenrui Li and Xin Yang	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry
P21 P22 P23 P24 P25 P26 P27 P28 P29	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang  Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár  Xiaohui Huang and Liyang Xiong  Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic  Chenrui Li and Xin Yang  Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li  Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang  Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár  Xiaohui Huang and Liyang Xiong  Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic  Chenrui Li and Xin Yang  Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li  Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong  Carlos Grohmann, Gulherme Garcia, Camila Viana,	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30 P35 P36	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic Chenrui Li and Xin Yang Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong Carlos Grohmann, Gulherme Garcia, Camila Viana, Helen Dias and Rebeca Coelho Haigang Sui, Hao Zhang, Qiming Zhou and Jianya	Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modelling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling  Constructing a True 3-D Model of a Karst Cave Using an UAV  RPA flight pattern and GCP influence on SfM-MVS modeling of a stable landslide in SE Brazil
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30 P35	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang  Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár  Xiaohui Huang and Liyang Xiong  Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic  Chenrui Li and Xin Yang  Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li  Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong  Carlos Grohmann, Gulherme Garcia, Camila Viana, Helen Dias and Rebeca Coelho	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling  Constructing a True 3-D Model of a Karst Cave Using an UAV  RPA flight pattern and GCP influence on SfM-MVS modeling of a stable landslide in SE Brazil  The true 3-D surface reconstruction using a multi-UAV cooperation method
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30 P35 P36 P37	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic Chenrui Li and Xin Yang Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong Carlos Grohmann, Gulherme Garcia, Camila Viana, Helen Dias and Rebeca Coelho Haigang Sui, Hao Zhang, Qiming Zhou and Jianya Gong	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling  Constructing a True 3-D Model of a Karst Cave Using an UAV  RPA flight pattern and GCP influence on SfM-MVS modeling of a stable landslide in SE Brazil  The true 3-D surface reconstruction using a multi-UAV cooperation method  Theory and Definitions
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30 P35 P36 P37	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic Chenrui Li and Xin Yang Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong Carlos Grohmann, Gulherme Garcia, Camila Viana, Helen Dias and Rebeca Coelho Haigang Sui, Hao Zhang, Qiming Zhou and Jianya Gong  Ian Evans, Yingkui Li and Zhibin Zhao	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling  Constructing a True 3-D Model of a Karst Cave Using an UAV  RPA flight pattern and GCP influence on SfM-MVS modeling of a stable landslide in SE Brazil  The true 3-D surface reconstruction using a multi-UAV cooperation method  Theory and Definitions  Dependence of statistical results on definitions and extents of study area: examples from cirques and glaciers
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30 P35 P36 P37 P38	Nicusor Necula and Mihai Niculita  Liyang Xiong, Jiang Yinghui and Sijin Li  Yu-Feng Ho, Tomislav Hengl and Leandro Parente  Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang  Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár  Xiaohui Huang and Liyang Xiong  Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic  Chenrui Li and Xin Yang  Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li  Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong  Carlos Grohmann, Gulherme Garcia, Camila Viana, Helen Dias and Rebeca Coelho  Haigang Sui, Hao Zhang, Qiming Zhou and Jianya Gong  Ian Evans, Yingkui Li and Zhibin Zhao  Hannes Reuter  Francisco Javier Ariza-López and Juan Francisco	Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon guilies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling  Constructing a True 3-D Model of a Karst Cave Using an UAV  RPA flight pattern and GCP influence on SfM-MVS modeling of a stable landslide in SE Brazil  The true 3-D surface reconstruction using a multi-UAV cooperation method  Theory and Definitions  Dependence of statistical results on definitions and extents of study area: examples from cirques and glaciers  Applying Terrain analysis to human population?
P21 P22 P23 P24 P25 P26 P27 P28 P29 P30 P35 P36 P37 P38	Nicusor Necula and Mihai Niculita Liyang Xiong, Jiang Yinghui and Sijin Li Yu-Feng Ho, Tomislav Hengl and Leandro Parente Jun Chen, Liyang Xiong, Guanghui Hu and Guoan Tang Juan Francisco Reinoso-Gordo and Francisco Javier Ariza-López  Adam Rusinko and Jozef Minár Xiaohui Huang and Liyang Xiong Tian Jia, Cheng-Zhi Qin, Ping Fu and Vladimir Brusic Chenrui Li and Xin Yang Dhanil Dev S G  Jiaxin Fan, Bo Wang, Wen Dai, Jiahui Yao and Mengqi Li Guohua Gou, Haigang Sui, Sheng Wang, Qiming Zhou and Jianya Gong Carlos Grohmann, Gulherme Garcia, Camila Viana, Helen Dias and Rebeca Coelho Haigang Sui, Hao Zhang, Qiming Zhou and Jianya Gong  Ian Evans, Yingkui Li and Zhibin Zhao Hannes Reuter	Big Data Geomorphometry  Machine learning classification of geomorphometric segments for floodplain detection and delineation  Super-resolution for terrain modeling using deep learning in High Mountain Asia  A Simply Updatable Cloud-based Ensemble Digital Terrain Model  Integrating topographic knowledge into point cloud simplification for terrain modelling  A method to rank global DEMs quality focused on their horizontal accuracy  Geomorphology & Landforms  The role of geomorphometric predictors in LUCC modeling  Mapping gully affected areas based on Sentinel 2 imagery and digital elevation model  Applicability of longitudinal profiles for glacial cirque classification  The influence of geo-environmental factors on spoon gullies on the Loess Plateau of China WITHDRAWN  Estimation of annual soil loss and erosion prospect zone of the Chittar sub-basin Kollam district, Kerala, India using RUSLE and AHP methods - an integrated approach  UAV geomorphometry  Point cloud filtering based on multi-scale coefficients of elevation variation for UAV-based terrain modelling  Constructing a True 3-D Model of a Karst Cave Using an UAV  RPA flight pattern and GCP influence on SfM-MVS modeling of a stable landslide in SE Brazil  The true 3-D surface reconstruction using a multi-UAV cooperation method  Theory and Definitions  Dependence of statistical results on definitions and extents of study area: examples from cirques and glaciers
